

BLOOM

design **Giulio Iacchetti**
2010

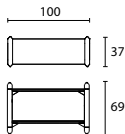

Bloom, selfstanding and double face bookshelf, Brings together the most difficult challenges and resolves the problem of formal distortion by simply rotating the weight bearing structural elements by 45°. This guarantees stability and visually simplifies the entire bookshelf. The vertical elements are crafted from aluminium tubing with special runners which allow the ‘buds’ to be attached. These are crafted in dye-cast aluminium and hold up the shelves. Bloom allows to create elegant lounge compositions, archives, library...

MATERIALS AND FINISHES

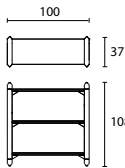

Uprights: aluminium.
Shelves: oak or walnut melamine.

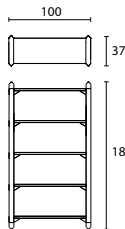

1 modulo H 69 con 2 ripiani / 1 module H 69 with 2 shelves

1 modulo H 108 con 3 ripiani / 1 module H 108 with 3 shelves

1 modulo H 186 con 5 ripiani / 1 module H 108 with 5 shelves

Bloom, libreria autoportante e bifacciale, raccoglie le sfide più ardue e risolve il problema della controventatura tramite la semplice rotazione di 45° delle strutture portanti, assicurando stabilità e alleggerendo visivamente la forma della libreria. I ritzi verticali in profilato di alluminio tubolare a sezione quadrata sono dotati di guide che permettono l’innesto dei germogli, in pressofusione di alluminio, sui quali si appoggiano i piani. Il sistema Bloom permettedi realizzare eleganti composizioni da salotto, archivi, librerie...

MATERIALI E FINITURE

Steli: alluminio verniciato champagne.
Piani: melaminico rovere o noce.
