

Ville-d'Avray, 1928

Armchair with structure in polished trivalent chrome plated (CR3) steel. Padded seat and backrest in polyurethane. The armrests are wider at the front and tapered towards the back.

Finishes available:

- blue satin, with the front part of the armrest featuring grey leather trimmings
- leather with coordinated armrest.

In this version of the sling chair, designed in 1928 for the Villa Church à Ville-d'Avray, the seat and backrest were padded to meet the client's request for maximum comfort.

Also in 1928, a similar padded model was created for the art gallery of collector Raoul La Roche. These first prototypes were used to define more accurately the structure of the 1929 model for the Salon d'Automne.

Authenticity

All the models in the Cassina collection, by merit of their artistic content and particular creative character, are protected by copyright, a legal institution that is universally recognised and safeguarded; legal protection is assured for the whole life-span of the author and for 70 years after his/her death (or the death of the last surviving co-author).

Designer

Le Corbusier, Pierre Jeanneret, Charlotte Perriand

In 1922, Le Corbusier began working in the new rue de Sèvres, Paris, atelier with his cousin Pierre Jeanneret with whom he shared research projects and design criteria in a profound and life-long professional relationship.

In October 1927, the pair decided to draw on the contribution of a young architect who had already begun to establish a reputation on the architectural scene of the time: Charlotte Perriand.

Their collaboration lasted through to 1937 and was extremely fruitful, especially in the field of furniture design. The partnership was highly significant, both in terms of the cultural weight of their achievements and their professional successes.

It was together with Charlotte Perriand that the pair tackled the innovative project for "l'équipement d'intérieur de l'habitation".

The resulting designs were of great intellectual value and considerable commercial success.

Thanks to Cassina's ongoing production, there is continued interest in the conceptual contents of the work and the level of quality attained.

Due to these characteristics, each item in the collection is eagerly awaited.
