

# Cassina

280 ZIG ZAG

Family **RIETVELD**

Catalogue | **Maestri**

Year of design **1934**

Year of production **1973 / 2011**

Chair in polished natural cherrywood, in natural ashwood or ashwood stained blue, red, yellow, white, black with edge in natural ashwood.

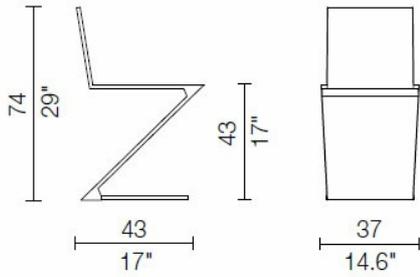

Back+Seat+ Support+Base.

Thanks to his use of diagonals, Rietveld was the first to introduce this new type of chair to the scene taking advantage of a new shape. Zig-zag is a chair with four panels that bend in sequence from top to bottom in an elegant dance to create what may at first seem an unstable chair but is in reality as firmly grounded as its design.

## Dimensions

## Authenticity

All the models in the Cassina collection, by merit of their artistic content and particular creative character, are protected by copyright, a legal institution that is universally recognised and safeguarded; legal protection is assured for the whole life-span of the author and for 70 years after his/her death (or the death of the last surviving co-author).

## Designer

**Gerrit Thomas Rietveld**

Gerrit Thomas Rietveld, born in Utrecht on 24 June 1888, seems possessed of two personalities, each so distinct that one might take his work to be that of more than one artist. The first personality is that seen in the craftsman cabinet-maker working in a primordial idiom, re-inventing chairs and other furniture as if no one had ever built them before him and following a structural code all of his own; the second is that of the architect working with elegant formulas, determined to drive home the rationalist and neoplastic message in the context of European architecture. The two activities alternate, overlap, and fuse in a perfect osmosis unfolding then into a logical sequence. In 1918 Rietveld joined the "De Stijl" movement which had sprung up around the review of that name founded the year before by Theo van Doesburg. The group assimilated and translated into ideology certain laws on the dynamic breakdown of compositions (carrying them to an extreme) that had already been expressed in painting by the cubists: the "De Stijl" artists also carefully studied the architectonic lesson taught by the great Frank Lloyd Wright, whose influence was widely felt in Europe at that time. Collaborating first with Robert van't Hoff and Vilmos Huszar, then with Theo van Doesburg and Cornelius van Eesteren, Rietveld soon became one of the most distinguished interpreters of the neoplastic message.

Among his most important works are:

the Schröder house at Utrecht (1924); the "Row Houses" at Utrecht (1931-34); the Dutch pavilion at the Venice Biennial (1954); the sculpture pavilion in the Rijksmuseum Kröller-Müller at Otterloo and the Van Gogh Museum in Amsterdam (1955). Out of his equally important furniture, Cassina has chosen for its own production: the "Red and Blue" (1918), the "Zig-Zag" (1934), the "Schröder 1" (1923), the "Utrecht" (1935)
