

Magneto, floor design Giulio Iacchetti 2011

FOSCARINI

Magneto is an essential and functional lamp featuring an invisible power: the magnetic field of a magnet. Indeed, the project focuses on a spherical magnet which combines two simple elements: a support rod with a round base and a compact LED light source, similar to an electric torch or a microphone, affording the utmost versatility of angling and movement along the rod. Magneto teams the flexibility of use of a lamp suitable for infinite solutions with absolute formal and functional simplicity. The intense, concentrated and focused light can be directed

down onto a small area, such as a book, a magazine, or a computer keyboard, or it can be directed up to create an atmosphere filled with suggestion. Hence, a multitude of usage requirements can be accommodated: from reading to diffused lighting. Magneto is available in two sizes, as a table lamp or a floor lamp, and in two colours, grey and red, to distinguish different spaces and moments: from offices to lounges, living rooms and bedrooms. At all times featuring a special, strong yet subtle, attractive and seductive personality, in a word: magnetic.

Magneto, floor technical info

FOSCARINI

Description

Reading lamp with direct light. Batch-dyed ABS diffuser with incorporated LED, epoxy powder coated steel base and rod. The "super magnet", spherical in shape and made of "rare earth" comoulded with a thermoplastic elastomer, acts as a joint and allows you to direct the torch and slide it vertically along the rod. The black cable, fitted with an ON/OFF pedal, runs visibly along the inside of the rod.

Materials lacquered stainless and ABS

Colors red, grey

Brightness light

directable direct light

Model

Magneto

Weight

net kg: 2,80
gross kg: 3,60

Packaging

vol. m3: 0,021
n. boxes: 1

Bulbs

LED 1x2,4W 2700° K 175 lm CRI>80 lm/W 73

Cable length

Certifications

Energy Class

A

FOSCARINI

Giulio Iacchetti

He has been an industrial designer since 1992. He also carries out an intense didactic work for several universities and design schools, in Italy and abroad. He was awarded a number of international prizes. In 2001 his project for a disposable fork "Moscardino" (designed with Matteo Ragni) won the Compasso d'Oro ADI and is now part of the permanent design exhibition at MOMA, New York.
