

Satellight, parete

by Eugeni Quisillet

FOSCARINI

DESCRIPTION

With a visual effect similar to transparent glass drape, the Satellight wall lamp has a soft, dreamy glow that is diffused by a satin-finish glass globe.

EUGENI QUITLLET

“Disoñador”, an invented word that is a mix between designer and dreamer: this is how Eugeni Quittlet defines himself. Having grown artistically in Barcelona, he is a creator of best-selling objects which go far beyond the simple combination of form and function, exploring the relationship between void and block,

discovering elegant silhouettes hidden within the material, imagining a future that is free from the force of gravity. The topic of weightlessness is truly a passion for him, and it can be found in many of his designs, created for major brands and awarded prestigious international accolades. His encounter with Foscarini led to the birth of the Satellight project, a light that fluctuates in space, captured in a glass bell.
