FOSCARINI

A simple curved band in blown glass, illustrating the profile of a soft volume that contains the light source. This is Tutù: a wall lamp where the diffuser and mount are held together by a pin, a structure recalling a ballerina's chignon. Its shape is asymmetrical with two parallel sides of different lengths. This makes the lamp even more versatile – it can be mounted with the longest side facing upwards or downwards. Tutù lets out a defined band of light upwards and downwards, and projects a warm light into the surrounding area through its diffuser.
