

Solaio. New version

HORM

Carlo Cumini
1997

Solaio bookcase becomes a wall modular system, offering various configurations for many compositions, thanks to the optional flap-door storage elements with push-pull opening. Back panels, shelves and doors are available in the seven matt or glossy finishes of the new color palette.

The uprights are in solid oak, painted natural or mocha, and they transform the light appearance of Solaio into a highly structured system. The shelves are the same length as the bookcase itself, without joins, up to a maximum of 290 cm.
