

.03 High

Maarten Van Severen & Fabian Schwaerzler, 1999/2011

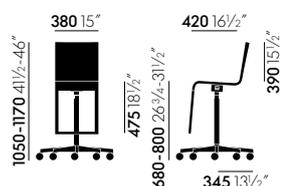

.03 High is based on various elements of the .03 and .04 chairs by Maarten Van Severen. The chair has the same clean lines and reductive forms that are typical of designs by Van Severen, making it a practical and durable office companion. At the same time, it serves the growing need and desire to alternate between sitting and standing postures while working. Paired with a stand-up table, .03 High makes this transition into a spontaneous and dynamic action: instead of raising or lowering the work surface, the user can simply sit down on the chair or stand up at the desk.

.03 High has no armrests. This enables the

user to sit sideways or in other positions – or simply to lean on the chair. Thanks to its pleasant pliability, which only becomes apparent upon use, the flexible integral foam shell provides comfortable seating over prolonged periods. .03 High is height-adjustable and has a footrest that serves as a useful support in both seated or standing positions.

- **Micro-mechanism:** rubber ball joint allows multi-directional movement. Height-adjustable.
- **Backrest and seat:** flexible backrest with integrated leaf springs. Polyurethane integral foam seat shell with upholstered effect, self-supporting on a steel frame.
- **Base:** five-star base with chrome-plated footrest, seat mount in die-cast aluminium. With reverse brake castors or glides.

DIMENSIONS (in accordance with EN 1335-1)

.03 High, counter chair, swivel, five-star base
