Audo

REVERSE TABLE LAMP
Designed by *Aleksandar Lazic*

*Audo Copenhagen launches
the Reverse Table Lamp in new materials.*

Aleksander Lazic's lighting design for Audo is a testament to timeless design and the beauty of natural materials. Inspired by the elegance of Italian marble tables from the 1970s, it combines simplicity with sophistication to create a truly unique lighting solution.

Crafted with meticulous attention to detail, the Reverse Table Lamp features a conical base and curved shade that define its perfectly balanced expression. The addition of black high gloss and Carrara marble elevates the lamp's aesthetic, adding a touch of luxury to any space.

Fitted with a dim-to-warm LED light source and a dimmer switch for adjusting light intensity, it offers versatility and functionality – whether casting warm light on a bedside table or providing subdued light on a cabinet surface. The Reverse Table Lamp comes with four interchangeable plugs for use in North America, China, Europe and the UK.

About the Designer

Studio Aleksandar Lazic, based in Denmark, is led by Aleksandar Lazic, who holds a Master's degree in Engineering with a specialisation in product development. This expertise is evident in his design process, where he skillfully balances the visionary aspects of design with meticulous execution in manufacturing. Despite the studio's relatively recent establishment, Aleksandar has dedicated a decade to developing furniture for some of the most prestigious brands in the Danish design industry.

Aleksandar's designs originate from a functional perspective – identifying a need and devising effective solutions. With a strong manufacturing background, his visual language is precise and characterised by his thoughtful selection of materials, chosen for their visual appeal, functionality and compatibility with intended manufacturing methods. His material palette focuses on natural materials, which develop their own unique story through patina over time, adding character and depth to the pieces.

His ultimate goal is to create timeless objects that grow more beautiful with use, merging the aesthetic traditions of the past with contemporary ideas about form and function.
