A versatile lighting solution for modern living

Normann Copenhagen is excited to unveil the Dim Linear Lamp, designed by multidisciplinary design and innovation agency R S W (Rudolph Schelling Webermann). Drawing inspiration from the evolving role of dining tables in contemporary living spaces, the Dim Linear Lamp caters to the diverse activities and lighting requirements of today's families.

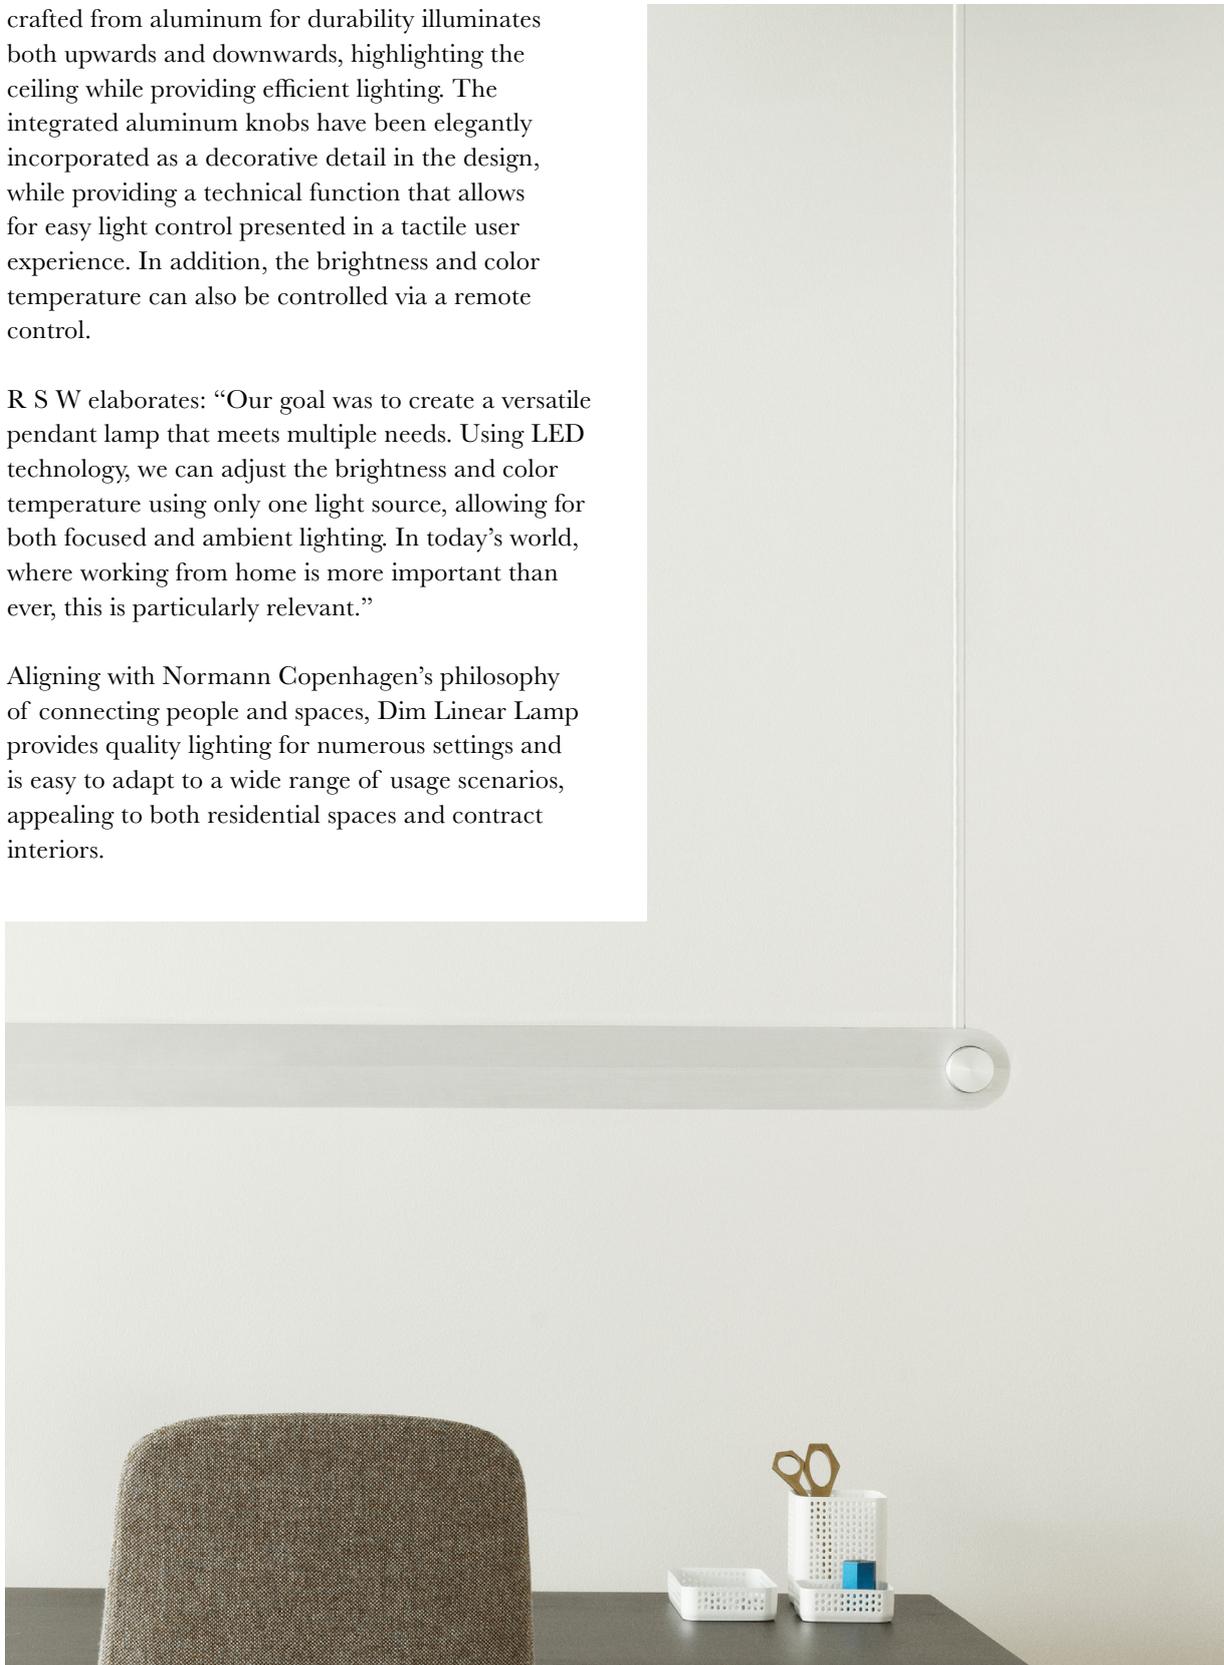

Recognizing that dining tables are no longer solely used for meals, but have become gathering spots for various activities, R S W developed a concept that offers versatile lighting options in contemporary homes, with a pendant lamp that offers adaptability and functionality.

Powered by LED technology, the Dim Linear Lamp allows users to adjust both brightness and color temperature, catering to various settings from cozy to productive. Its meticulously designed, clever shape crafted from aluminum for durability illuminates both upwards and downwards, highlighting the ceiling while providing efficient lighting. The integrated aluminum knobs have been elegantly incorporated as a decorative detail in the design, while providing a technical function that allows for easy light control presented in a tactile user experience. In addition, the brightness and color temperature can also be controlled via a remote control.

R S W elaborates: “Our goal was to create a versatile pendant lamp that meets multiple needs. Using LED technology, we can adjust the brightness and color temperature using only one light source, allowing for both focused and ambient lighting. In today’s world, where working from home is more important than ever, this is particularly relevant.”

Aligning with Normann Copenhagen’s philosophy of connecting people and spaces, Dim Linear Lamp provides quality lighting for numerous settings and is easy to adapt to a wide range of usage scenarios, appealing to both residential spaces and contract interiors.

Connecting People and Spaces

Since Normann Copenhagen's foundation in 1999, our ambition has been to challenge conventional thinking and make the ordinary extraordinary through great design. By combining the craftsmanship, functionality and endurance characterized by our Danish design heritage with modern silhouettes and durable materials, we aim to create original products in a contemporary design that withstand the test of time. We believe in uniting people and spaces across the world and improving the quality of people's lives through the power of great design. Our products combine functionality and design and accommodate the diversity of needs of modern life in residential and professional interiors alike.
