# NELSON WALL SCONCE COLLECTION DESIGN BY HERMAN MILLER, AVAILABLE FROM HAY

Designed by pioneering American designer George Nelson in 1947, and first produced in 1952, the Bubble Lamp signaled a revolution in the Modernist lighting industry. Available in an assortment of organic sizes and shapes, these elegant orbs were inspired by a set of silk-covered Swedish pendant lamps Nelson wanted for his office, but found to be too expensive. Employing the resourcefulness that characterized his working process, he decided to use a self-webbing plastic spray developed by the U.S. military, and applied it over a lightweight, rounded-steel frame to produce these soft, glowing fixtures.

Born in Connecticut, USA, George Nelson (1908-1986) was one of the most influential figures in the crucial early period of modern design. Trained at Yale as an architect and a fine artist, he believed that a designer's job was to better the world, using the perfection of nature's creations as his guide. Two formative years in Rome following his receipt of the prestigious Rome Prize brought him into contact with the world's leading modernists, including Le Corbusier, Mies Van der Rohe, Walter Gropius, Gio Ponti, and many others, and helped shape his career as a writer and industrial designer, who would change the course of history.
