

Lampshades

The BC1 wall lamp has a pivoting metal consisting of an angled tube that feeds the cable downwards to the nearest socket. The arm has a beech handle at the bottom end to adjust the shade according to the light intensity needed.

The BC2 wall lamp has a fixed arm with a straight transition from the vertical arm which is completed with a beech wood finial, joining it to the wall and hiding the socket.

The BC3 wall lamp has a pivoting metal arm consisting of an angled tube that fits into a metal bracket, hiding the wall socket.
